DIGATRADE FILES Q1.2021 FINANCIAL STATEMENTS & MDA

For Immediate Release

Vancouver, British Columbia – April 28, 2021 – **DIGATRADE FINANCIAL CORP** (OTC.PK: DIGAF) a financial technology “Fintech” company today announced it has filed the Q1.2021 financial statements and MDA for period ended March 31, 2021 on Sedar and Edgar.

Forward-Looking Information

This press release contains certain “forward-looking information”. All statements, other than statements of historical fact, that address activities, events or development that the Company believes, expects or anticipates will or may occur in the future constitute forward-looking information. This forward-looking information reflects the current expectations or beliefs of the company based on information currently available to the Company. Forward-looking information is subject to a number of significant risks and uncertainties and other factors that may cause the actual results of the Company to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on the Company. Factors that could cause actual results or events to differ materially from current expectations include, but are not limited to, the possibility of unanticipated costs and expenses. Any forward-looking information speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the company disclaims any intent or obligation to update any forward-looking information whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Management's Responsibility for Financial Reporting

These unaudited consolidated financial statements have been prepared by and are the responsibility of the management of the Company. The unaudited consolidated financial statements have been prepared in accordance with International Financial Reporting Standards, using management's best estimates and judgments based on currently available information. When alternative accounting methods exist, management has chosen those it considers most appropriate in the circumstances.

The Company maintains an appropriate system of internal controls to provide reasonable assurance that financial information is accurate and reliable and that the Company's assets are appropriately accounted for and adequately safeguarded.

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

NOTE 1 – NATURE AND CONTINUANCE OF OPERATIONS

Digatrade Financial Corp. (the “Company”) is governed by the Business Corporations Act (British Columbia). The head office, principal address, and records office of the Company are located at 1500 West Georgia Street, Suite 1300, Vancouver, British Columbia, Canada, V6C 2Z6. The Company's common shares are listed on the NASDAQ Over-the-Counter Board (“OTCB”) exchange under the symbol "DIGAF".

In March 2015, the Company entered into an agreement with Mega Ideas Holdings Limited, dba ANX (“ANX”), a company incorporated and existing under the laws of Hong Kong. ANX owns a proprietary trading platform and provides operational support specializing in blockchain development services and exchange and transaction services for crypto-currencies. Effective October 17, 2018 the Company closed the online retail trading platform and shared liquidity order book with ANX International owing to low transaction volumes. The Company will continue to offer OTC trading for institutional customers and accredited traders while continuing to seek new opportunities within the blockchain and the financial technology sector.

In February 2019, the Company entered into a Definitive Agreement with Securter Inc. (“Securter”), a private Canadian corporation that is developing a proprietary, patent-pending credit card payment platform to significantly increase the security of online credit card payment processing (Note 5).

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards on the basis that the Company is a going concern and will be able to meet its obligations and continue its operations for its next fiscal year. Several conditions as set out below cast uncertainties on the Company’s ability to continue as a going concern.

The outbreak of the COVID-19 virus and the worldwide pandemic has impacted the Company’s plans and activities. The Company may face disruption to operations, supply chain delays, travel and trade restrictions, and impacts on economic activity in affected countries or regions can be expected and are difficult to quantify. Regional disease outbreaks and pandemics represent a serious threat to hiring and maintaining a skilled workforce and could be a major health-care challenge for the Company. There can be no assurance that the Company’s personnel will not be impacted by these regional disease outbreaks and pandemics and ultimately that the Company would see its workforce productivity reduced or incur increased medical costs and insurance premiums as a result of these health risks.

In addition, the pandemic has created a dramatic slowdown in the global economy. The duration of the outbreak and the resulting travel restrictions, social distancing recommendations, government response actions, business disruptions and business closures may have an impact on the Company’s operations and access to capital. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about by the pandemic’s impact on global industrial and financial markets which may reduce prices in general, share prices and financial liquidity thereby severely limiting access to essential capital.

The Company’s ability to continue as a going concern is dependent upon the financial support from its creditors, shareholders, and related parties, its ability to obtain financing for its development projects, and upon the attainment of future profitable operations.

The Company has not yet achieved profitable operations and has accumulated losses of \$10,303,973 since inception and working capital deficiency of \$147,795 as at March 31, 2021. Accordingly, the Company will need to raise additional funds through future issuance of securities or debt financing. Although the Company has raised funds in the past, there can be no assurance the Company will be able to raise sufficient funds in the future, in which case the Company may be unable to meet its obligations as they come due in the normal course of business. It is not possible to predict whether financing efforts will be successful or if the Company will attain a profitable level of operations.

The current cash resources are not adequate to pay the Company’s accounts payable and to meet its minimum commitments at the date of these consolidated financial statements, including planned corporate and administrative expenses, and other project costs; accordingly, there is significant doubt about the Company’s ability to continue as a going concern. These consolidated financial statements do not give effect to adjustments that would be necessary to the carrying amounts and classifications of assets and liabilities should the Company be unable to continue as a going concern.

7

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

a) Basis of Presentation

These consolidated financial statements have been prepared on a historical cost basis except for financial instruments classified as available-for-sale that have been measured at fair value. Cost is the fair value of the consideration given in exchange for net assets.

b) Statement of Compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These consolidated financial statements were approved and authorized for issue by the Board of Directors on April 09, 2021.

c) Basis of Consolidation

These consolidated financial statements include the accounts of the Company and its subsidiaries (collectively, the “Company”). Intercompany balances and transactions are eliminated in preparing the consolidated financial statements. The following companies have been consolidated within these consolidated financial statements:

| Entity | Country of Incorporation | Voting Control | Functional Currency |
|---------------------------|--------------------------|----------------|---------------------|
| Digatrade Financial Corp. | Canada | Parent Company | Canadian Dollar |
| Digatrade Limited | Canada | 100% | Canadian Dollar |
| Digatrade (UK) Limited | United Kingdom | 100% | Pounds Sterling |
| Digatrade Limited | USA | 100% | US Dollar |

d) Foreign Currency

These consolidated financial statements are presented in Canadian dollars, which is also the functional currency of the parent company. Each subsidiary determines its own functional currency (Note 2(c)) and items included in the financial statements of each subsidiary are measured using that functional currency.

i. Transactions and Balances in Foreign Currencies

Foreign currency transactions are translated into the functional currency of the respective entity using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items at year-end exchange rates are recognized in profit or loss. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and are not retranslated. Non-monetary items measured at fair value are translated using the exchange rate at the date when fair value was determined.

ii. Foreign Operations

On consolidation, the assets and liabilities of foreign operations are translated into Canadian dollars at the exchange rate prevailing at the reporting date and their revenues and expenses are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on the translation are recognized in other comprehensive income and accumulated in the currency translation reserve in equity. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognized in earnings and recognized as part of the gain or loss on disposal.

e) Financing and Finder's Fees

Financing and finder's fees relating to financial instruments with a term of one year or less are expensed in the period incurred. For financial instruments with a term of over one year, the fees are netted against the financial instruments and amortized over the term of the financial instruments.

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (Continued)

f) Share Capital

The Company records proceeds from share issuances, net of commissions and issuance costs. Shares issued for other than cash consideration are valued at either: (i) the fair value of the asset acquired or the fair value of the liability extinguished at the measurement date under current market conditions, or (ii) the quoted price on the Over-the-Counter Bulletin Board in the United States based on the earliest of: the date the shares are issued, or the date the agreement to issue the shares is reached.

g) Loss per Share

Basic loss per share is calculated by dividing net loss by the weighted average number of common shares issued and outstanding during the reporting period. Diluted loss per share is the same as basic loss per share, as the issuance of shares on the exercise of stock options and share purchase warrants is anti-dilutive.

h) Share-Based Payments

The fair value method of accounting is used for share-based payment transactions. Under this method, the cost of stock options and other share-based payments is recorded based on the estimated fair value using the Black-Scholes option-pricing model at the grant date and charged to profit over the vesting period. The amount recognized as an expense is adjusted to reflect the number of equity instruments expected to vest.

Upon the exercise of stock options and other share-based payments, consideration received on the exercise of these equity instruments is recorded as share capital and the related share-based payment reserve is transferred to share capital. The fair value of unexercised equity instruments are transferred from reserve to retained earnings upon expiry.

i) Income Taxes

Tax expense recognized in profit or loss comprises the sum of deferred tax and current tax not recognized in other comprehensive income or directly in equity.

i. Current Income Tax

Current income tax assets and liabilities comprise those claims from, or obligations to, fiscal authorities relating to the current or prior reporting periods that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the consolidated financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

ii. Deferred Income Tax

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realization, provided they are enacted or substantively enacted by the end of the reporting period. Deferred tax liabilities are always provided for in full.

Deferred tax assets are recognized to the extent that it is probable that they will be able to be utilized against future taxable income. Deferred tax assets and liabilities are offset only when the Company has a right and intention to offset current tax assets and liabilities from the same taxation authority.

Changes in deferred tax assets or liabilities are recognized as a component of tax income or expense in profit or loss, except where they relate to items that are recognized in other comprehensive income or directly in equity, in which case the related deferred tax is also recognized in other comprehensive income.

j) Revenue Recognition

Revenue is comprised of consulting fees and commissions earned on trades executed on the digital currency trading platform. Consulting fee income is recognized as the consulting services are provided. Commission is considered earned when a trade is completed by the Company’s customers. As the platform is not yet fully live, commissions and consulting fees earned have been accounted for as a recovery of development costs incurred.

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (Continued)

k) Financial Instruments

The following is the Company’s accounting policy for financial instruments under IFRS 9:

(i) Classification

The Company classifies its financial instruments in the following categories: at fair value through profit and loss (“FVTPL”), at fair value through other comprehensive income (loss) (“FVTOCI”) or at amortized cost. The Company determines the classification of financial assets at initial recognition. The classification of debt instruments is driven by the Company’s business model for managing the financial assets and their contractual cash flow characteristics. Equity instruments that are held for trading are classified as FVTPL. For other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or if the Company has opted to measure them at FVTPL.

The following table shows the classification under IFRS 9:

| | |
|------------------------------|----------------|
| Financial assets/liabilities | Classification |
| Cash | FVTPL |
| Marketable Securities | FVTPL |
| Accounts payable | Amortized cost |

(ii) Measurement

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in the Consolidated Statements of Comprehensive Income. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are included in the Consolidated Statements of Comprehensive Income in the period in which they arise.

(iii) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to twelve month expected credit losses. The Company shall recognize in the Consolidated Statements of Comprehensive Income, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

l) Non-Controlling Interest

Non-controlling interest in the Company’s less than wholly owned subsidiary is classified as a separate component of equity. On initial recognition, non-controlling interest is measured at the fair value of the non-controlling entity’s contribution into the related subsidiary. Subsequent to the original transaction date, adjustments are made to the carrying amount of non-controlling interest for the non-controlling interest’s share of changes to the subsidiary’s equity.

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (Continued)

m) Accounting Standards Effective January 1, 2020

Amendments to IFRS 7 and 9 and IAS 39

On September 26, 2019, IASB amended some of the existing IFRSs requirements for hedge accounting. The amendments are designed to support the provision of useful financial information by companies during the period of uncertainty arising from the phasing out of interest-rate benchmarks such as IBORs. The amendments modify some specific hedge accounting requirements to provide relief from potential effects of the uncertainty caused by the IBOR reform. In addition, the amendments require companies to provide additional information to investors about their hedging relationships which are directly affected by these uncertainties. These amendments were effective for annual periods beginning on or after January 1, 2020 and must be applied retrospectively. Early application is permitted.

In the application of the Company's accounting policies which are described in Note 2, management is required to make judgments, estimates, and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods. Significant judgments, estimates, and assumptions that have the most significant effect on the amounts recognized in the consolidated financial statements are described below.

Deferred Tax Assets

Deferred tax assets, including those arising from unutilized tax losses, require management to assess the likelihood that the Company will generate sufficient taxable earnings in future periods in order to utilize recognized deferred tax assets. Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. In addition, future changes in tax laws could limit the ability of the Company to obtain tax deductions in future periods. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impacted.

Share-based Compensation

The fair value of share-based compensation is subject to the limitations of the Black-Scholes option pricing model that incorporates market data and involves uncertainty in estimates used by management in the assumptions. Because the Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

Impairment of Assets

An impairment loss is recognized for the amount by which the asset's or cash generating unit's carrying amount exceeds its recoverable amount. To determine the recoverable amount, management estimates expected future cash flows from each asset or cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. In the process of measuring expected future cash flows, management makes assumptions about future operating results. In addition, when determining the applicable discount rate, estimation is involved in determining the appropriate adjustments to market risk and asset-specific risk factors. These assumptions relate to future events and circumstances. Actual results may vary and may cause significant adjustments to the Company's assets within the next financial year.

Fair Value of the Embedded Derivatives in the Convertible Debentures

The Company has determined that its functional currency is the Canadian dollar and has issued convertible debentures with face value in US dollars. Furthermore, the Company conversion feature of the 2018, 2019 and 2020 convertible debentures failed the fixed-for-fixed equity classification provision due to the debentures being denominated in a foreign currency and a variable number of shares being issuable.

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

NOTE 3 – SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (Continued)**Fair Value of the Embedded Derivatives in the Convertible Debentures (Continued)**

As such, the convertible debentures consisted of a liability component ("financial liability") and an embedded derivative conversion feature ("derivative liability") and contra asset account of deferred derivative loss due to significant amount of fair value of the derivative liability at inception in excess of the net proceeds. The net proceeds of these convertible bonds were first allocated to the fair value of the derivative liability. As the fair value of the derivative liability at inception exceeds the net proceeds, the indication of significant loss at inception exists. As a result, nominal values of US\$1,000 per newly issued convertible bonds were allocated to the financial liability. The remaining balance was set up as deferred derivative loss as a contra asset account. The deferred derivative losses were then amortized to profit and loss over the life of the convertible bonds. Subsequent changes in fair value of the conversion feature were recognized at FVTPL.

The Company measures the fair value of the embedded derivative by reference to the fair value on the convertible debenture issuance date with an estimated life ending on the convertible debenture maturity date and revalues them at each reporting date. In determining the fair value of the embedded derivatives, the Company used the Black-Scholes option pricing model with the following assumptions: average volatility rate; market price at the reporting date; risk-free interest rate; the remaining expected life of the embedded derivatives and an exchange rate at the reporting date. The inputs used in the Black-Scholes model are taken from observable markets. Changes to assumptions used can affect the amounts recognized in the consolidated financial statements.

NOTE 4 – SECURTER SYSTEMS INC.

On February 26, 2019, the Company entered into an agreement with Securter Inc., in terms of which a newly formed corporation, Securter Systems Inc. ("SSI") would acquire all the assets and liabilities of Securter Inc. Upon incorporation, SSI issued 25,937,594 Class A common shares ("Original Class A Common Shares") to the shareholders of Securter Inc. and 100,000 Class B common shares to the Company. Each Class B common share is non-participating and carries 1,000 votes. The Company shall have the right to purchase up to 30.3% Original Class A Common Shares of SSI at a price of US\$0.23 per share for a total purchase consideration of up to US\$3,000,000.

As at December 31, 2019, SSI had 26,064,546 Original Class A Common Shares issued and outstanding whereby the Company held 126,951 of Original Class A Common Shares of SSI. Together with the Company's holding in Class B common shares, the Company held a voting interest of 79.4% and a participating economic interest of 0.49% as at December 31, 2019. During the period January 1, 2020 to September 8, 2020, SSI issued a further 733,482 Original Class A Common Shares to the Company, giving the Company a voting interest of 79.1% and a participating economic interest of 3.13% or 860,433 Original Class A Common Shares in SSI as at September 8, 2020.

On September 8, 2020, SSI effected a reorganization of its capital structure. All the issued and outstanding Original Class A Common Shares and Class B shares of SSI were cancelled, and new Class A shares ("New Class A Common Shares") were issued. As a result of the reorganization, the Company received 4,396,000 New Class A Common Shares or 16% ownership of SSI in exchange for the Company's return of its 860,433 Original Class A Common Shares and its 100,000 Class B common shares. Consequently, the Company ceased to hold voting control of SSI on September 8, 2020. The reorganization is accounted for as the disposition of SSI, the subsidiary by the Company. The fair value of the consideration received, the 4,396,000 New Class Common Shares or 16% economic interest in SSI is estimated at \$Nil. This is based on the early stage of the business project of SSI and the uncertainty of ability to finance the development cost to commercialization of SSI's business project.

DIGATRADE FINANCIAL CORP.Notes to the Consolidated Financial Statements
March 31, 2021 and 2020

(Expressed in Canadian Dollars)

As of March 31, 2020, the carrying value of SSI net assets were as follows:

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

The convertible bonds consisted of a liability component (“financial liability”) and an embedded derivative conversion feature (“derivative liability”) and contra asset account of deferred derivative loss due to significant amount of fair value of the derivative liability at inception in excess of the net proceeds. The net proceeds of these convertible bonds were first allocated to the fair value of the derivative liability. As the fair value of the derivative liability at inception exceeds the net proceeds, the indication of significant loss at inception exists. As a result, nominal values of US\$1,000 per newly issued convertible bonds were allocated to the financial liability. The remaining balance was set up as deferred derivative loss as a contra asset account. The deferred derivative losses were then amortized to profit and loss over the life of the convertible bonds. Subsequent changes in fair value of the conversion feature were recognized at FVTPL (Note 2(k)).

a) During the three months ended March 31, 2021, the Company issued convertible promissory notes for gross proceeds of \$184,837 (US\$147,500) (three months ended March 31, 2020 – \$88,149 (US\$66,500)). The notes are unsecured, bear interest at between 10% and 12% per annum from the date of issuance and mature between six months and one year after the date of issuance. Any amount of interest or principal that is not paid on the maturity date bears interest at 15% to 22% per annum from the maturity date to the date of payment. Any amount of principal and/or interest that is unpaid may be converted, at the option of the holder, in whole or in part into common shares of the Company at a price equal to 61% of the Market Price. The “Market Price” means either the lowest closing bid price for the Company’s stock as reported on the OTC during the fifteen trading days or the average of the two closing bid prices during the twenty-five trading days prior to a Notice of Conversion. The Company may prepay the principal and all accrued interest at any time between the date of issuance and the maturity date, together with a prepayment premium of between 15% and 40% of the amount prepaid, determined by reference to the date of repayment.

At inception, the net proceeds of \$171,621 (US\$137,000 or gross proceeds of US\$147,500 net of US\$10,500 cash discount and transaction costs) were allocated to the derivative liability at \$761,214 related to the conversion feature which was determined using the Black-Scholes option pricing model. The remaining balance of the net proceeds were then allocated to nominal values of \$3,771 (US\$1,000 per each convertible bond issued) and deferred derivative loss, a contra asset account of \$593,364.

b) During the three months ended March 31, 2021, the Company recognized through profit and loss a change in the fair value of the derivative liability and the amortization of the deferred derivative loss of \$350,496 (March 31, 2020 – \$57,109). As at March 31, 2021, the fair value of the derivative liability related to the conversion feature of \$668,608 was determined using the Black-Scholes option pricing model based on the following assumptions: share price of US\$0.0087; a risk-free rate of 0.23%; stock price volatility ranging from 297% to 363%; dividend yield of 0%; and expected life of conversion features ranging from 0.23 to 0.93 years. (December 31, 2020 – \$1,610,858, determined using the Black-Scholes option pricing model based on the following assumptions: share price ranging from US\$0.001 to US\$0.004; a risk-free rate of 0.25%; stock price volatility ranging from 172% to 502%; dividend yield of 0%; and expected life of conversion features ranging from 0 to 0.8 years.)

c) During the three months ended March 31, 2021, promissory notes with a face value of US\$206,000 were converted into 87,526,697 common shares of the Company (three months ended March 31, 2020 - US\$171,575 converted and 229,986,206 common shares issued).

NOTE 7 – SHARE CAPITAL

a) **Authorized Capital**

Unlimited number of common shares, participating, voting (voting right of 1 vote per share), with no par value.

b) Issued and Outstanding Common Shares

- i. During the three months ended March 31, 2020, the Company converted promissory notes with face value of US\$171,575 into 229,986 common shares of the Company. An amount of \$252,102 was allocated to the share capital in connection with these promissory note conversions.
- ii. During the three months ended March 31, 2021, the Company converted promissory notes with face value of US\$206,000 into 87,526,697 common shares of the Company. An amount of \$1,197,425 was allocated to the share capital in connection with these promissory note conversions.

15

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

c) Share Purchase Warrants

The Company had no share purchase warrants outstanding as of March 31, 2021 and December 31, 2020.

e) Stock Options

On February 14, 2019, the Company granted 5,750,000 stock options to directors of the Company and 4,250,000 stock options to consultants. The options have an exercise price of US\$0.006 and expire on February 14, 2027. The continuity of stock options is summarized below:

| Expiry Date | Exercise Price | December 31, 2020 | Granted 2019 | Exercised | Cancelled | March 31, 2021 |
|-------------------|----------------|----------------------|-----------------|-----------|-----------|-------------------|
| February 14, 2027 | \$ US0.006 | 10,000,000 | - | - | - | 10,000,000 |

The Company did not issue any stock options in 2020.

f) Escrow Shares

On September 19, 2014, the Company entered into an escrow agreement with a creditor. The Company agreed to pay the creditor \$2,500 upon signing of the agreement and to issue 1,500 shares to be held in escrow. The Company was obligated to pay the creditor a further \$7,334 (US\$6,687) forty-five days after the Company's stock becomes DWAC-eligible. On December 22, 2016, the Company paid \$5,374 (US\$4,000) and the creditor agreed to release these shares from escrow.

As of March 31, 2021 and December 31, 2020, the 1,500 shares were held in trust by the corporate lawyer and have not been returned to the Company's Treasury.

NOTE 8 – RELATED PARTY TRANSACTIONS

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed. Details of transactions between the Company and other related parties, in addition to those transactions disclosed elsewhere in these consolidated financial statements, are described below. All related party transactions were in the ordinary course of business and were measured at their exchange amounts.

a) Compensation of Key Management Personnel

- i. The Company incurred management fees for services provided by key management personnel for the three months ended March 31, 2021 and 2020, as described below.

| | March 31, 2021 | March 31, 2020 |
|-----------------|----------------|----------------|
| | \$ | \$ |
| Management Fees | 50,732 | 64,520 |

- ii. During the three months ended March 31, 2021, the Company incurred consulting fees for services provided by a former director of the Company in the amount of \$Nil (three months ended March 31, 2020 -\$1,831).

NOTE 9 – FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company is exposed to various risks in relation to financial instruments. The Company's financial assets and liabilities by category are summarized in Note 2(k). The Company's risk management is coordinated in close co-operation with the board of directors and focuses on actively securing the Company's short to medium-term cash flows and raising financing for the Company's capital expenditure program. The Company does not actively engage in the trading of financial assets for speculative purposes. The most significant financial risks to which the Company is exposed are as follows:

16

DIGATRADE FINANCIAL CORP.

Notes to the Consolidated Financial Statements

March 31, 2021 and 2020

(Expressed in Canadian Dollars)

a) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company is dependent upon the availability of credit from its suppliers and its ability to generate sufficient funds from equity and debt financing to meet current and future obligations. The Company has a working capital deficiency of \$238,702 as at December 31, 2020. There can be no assurance that such debt or equity financing will be available to the Company.

b) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk as the interest rates associated with the convertible promissory notes are fixed.

c) Credit Risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. As the Company is in the development stage and has not yet commenced commercial production or sales, it is not exposed to significant credit risk.

d) Foreign Exchange Risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to foreign exchange risk to the extent it incurs currency exchange platform service and development expenditures and operating costs in foreign currencies including the U.S. Dollar. The Company does not hedge its exposure to fluctuations in the related foreign exchange rates.

e) Fair Values

The Company uses the following hierarchy for determining fair value measurements:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement. The Company's financial instruments were measured at fair value using Level 1 valuation technique during the years ended December 31, 2020, 2019 and 2018. The carrying values of the Company's financial assets and liabilities approximate their fair values.

NOTE 10 – CAPITAL MANAGEMENT

The Company's objective for managing its capital structure is to safeguard the Company's ability to continue as a going concern and to ensure it has the financial capacity, liquidity and flexibility to fund its ongoing operations and capital expenditures.

The Company manages its share capital as capital, which as at March 31, 2021, amounted to \$10,073,706. At this time, the Company's access to the debt market is limited and it relies on equity issuances and the support of shareholders to fund the development of its business. The Company monitors capital to maintain a sufficient working capital position to fund annualized administrative expenses and capital investments.

As at March 31, 2021, the Company had a working capital deficiency of \$147,795. The Company will issue shares and may from time to time adjust its capital spending to maintain or adjust the capital structure. There can be no assurance that the Company will be able to obtain debt or equity capital in the case of operating cash deficits.

The Company's share capital is not subject to external restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any contemplated in the foreseeable future. There were no changes in the Company's approach to capital management during the three months ended March 31, 2021.

NOTE 11 – SUBSEQUENT EVENTS

The Company did not identify any subsequent events during the period from April 1, 2021, to the date of this report.

DIGATRADE FINANCIAL CORPORATION

For Three Months Ending March 31, 2021

DIGATRADE FINANCIAL CORPORATION

Management's Discussion and Analysis of Financial Conditions and Results of Operations

("MD&A")

For the three months ending March 31, 2021

This report is dated April 28, 2021

The following discussion and analysis prepared as at April 27, 2021, explains trends in the financial condition and results of operations of Digatrade Financial

Corporation. (“Digatrade” or “the Company”) for the three months ended March 31, 2021 as compared to the same period in 2020. This discussion and analysis of the results of operations and financial condition of the Company should be read in conjunction with the unaudited consolidated financial statements of the Company for the three months ended March 31, 2021. The Company’s critical accounting estimates, significant accounting policies and risk factors have remained substantially unchanged and are still applicable to the Company unless otherwise indicated. The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS). All financial statement figures are reported in Canadian dollars unless explicitly stated otherwise.

Caution on Forward-Looking Information

This report contains certain statements that constitute forward-looking information. These forward-looking statements are not descriptive of historical matters and may refer to management’s expectation or plans. These statements include but are not limited to statements concerning our business objectives and plans and future trends in our industry. Inherent in forward-looking statements are risks and uncertainties beyond management’s ability to predict or control including risks that may affect Digatrade’s operating or capital plans. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements in this discussion and analysis as well as contained in other components of the annual report. Such statements are based upon a number of assumptions that may prove incorrect, including but not limited to, the following assumptions: that there is no material deterioration in general business and economic conditions; that there are no unanticipated fluctuations in interest or exchange rates; that there is no cancellation or unfavorable variation to its current major contracts; that if required, Digatrade is able to finance future acquisitions on reasonable terms; and that Digatrade maintains its ongoing relations with its business partners. We caution you that the foregoing list of important factors and assumptions is not exhaustive. You should also carefully consider matters discussed under “Risk and Uncertainties” contained elsewhere in this discussion. Digatrade undertakes no obligation to update publicly or otherwise revise any forward-looking statements or the list of factors, whether as a result of new information or future events or otherwise, except as may be required under applicable laws.

Overview

The Company is a British Columbia corporation, incorporated on December 28, 2000. The registered and corporate office is at 1500 West Georgia Street, Suite 1300, Vancouver, British Columbia, Canada, V6C 2Z6. The Company does not have an agent in the United States.

2

DIGATRADE FINANCIAL CORPORATION

Management’s Discussion and Analysis of Financial Conditions and Results of Operations

(“MD&A”)

For the three months ending March 31, 2021

The Company was incorporated under the name Black Diamond Holdings Corporation. On June 26, 2007, the Company changed its name from Black Diamond Holdings Corporation to Black Diamond Brands Corporation. On November 21, 2008, the Company changed its name to Rainchief Energy Inc. and on February 19, 2015 to Bit-X Financial Corporation. On October 27, 2015, the Company changed its name to Digatrade Financial Corporation.

Digatrade Financial Corp. is a financial technology (FinTech) services company. The Company has been focused on the financial technology industry since 2015. During that time, the Company has pursued several different areas of business including blockchain development services, transaction services for cryptocurrencies (e.g., Bitcoin) and other related financial services technologies.

In March 2015, the Company entered into an agreement with Mega Ideas Holdings Limited, dba ANX (“ANXPRO and ANX International”), a company incorporated and existing under the laws of Hong Kong. ANX owns a proprietary trading platform and provides operational support specializing in blockchain development services and exchange and transaction services for crypto-currencies e.g. Bitcoin and other digital assets. Effective October 17, 2018 the Company closed its online retail trading platform but will continue to evaluate opportunities and continue with research in digital-asset trading for prospective institutional customers while continuing to seek new opportunities within the blockchain and the financial technology services (non-trading) sector.

On February 28, 2019, the Company executed a Definitive Agreement with Securter Inc., a private Canadian Corporation that is developing a proprietary, patent-pending credit card payment platform to significantly increase the security of online credit card payment processing. Securter technology reduces immense losses by financial institutions and merchants that arise from fraudulent credit card use and protects cardholder privacy by eliminating the distribution of personal information to third parties. With the current worldwide surge in online commerce expected to continue for years to come, the problem of credit card security is large and growing. The Definitive Agreement with Securter sets out that Securter’s technology will be launched and commercialized as a Digatrade subsidiary.

The Company is listed as a fully reporting issuer on the FINRA OTC bulletin board and trades under the symbol “DIGAF”.

Prior to the change of name on February 19, 2015, the Company was an energy exploration company focused on the identification and evaluation for acquisition of energy assets.

Organization Structure

As of the date of this report the Company has three wholly-owned subsidiaries, Digatrade Limited (a British Columbia corporation), Digatrade Limited (a Nevada corporation), Digatrade (UK) Limited (a United Kingdom corporation),

3

DIGATRADE FINANCIAL CORPORATION

Management’s Discussion and Analysis of Financial Conditions and Results of Operations

(“MD&A”)

For the three months ending March 31, 2021

Recent corporate developments

During the period commencing on January 1, 2021, until the date of the report, the Company experienced the following corporate developments:

Convertible Promissory Notes Issued

During the period January 1, 2021 to the date of this report, the Company issued further convertible promissory notes, raising net proceeds of \$174,127 (US\$137,000).

The notes are unsecured, bear interest at between 10% and 12% per annum from the date of issuance and mature between six months and one year after the date of issuance.

Any amount of interest or principal that is not paid on the maturity date bears interest at 15% to 22% per annum from the maturity date to the date of

payment. Any amount of principal and/or interest that is unpaid may be converted, at the option of the holder, in whole or in part into common share of the Company at a price equal to 61% of the Market Price. The “Market Price” means the lowest closing bid price for the Company’s stock as reported on the OTC during the fifteen trading days or the average of the two lowest closing bid prices during the twenty-five days prior to a Notice of Conversion. The Company may prepay the principal and all accrued interest at any time between the date of issuance and the maturity date, together with a prepayment premium of between 15% and 40% of the amount prepaid, determined by reference to the date of repayment.

Conversion of Convertible Promissory Notes

During the period January 1, 2021 to the date of this report, the Company converted promissory notes with a face value of US\$153,880 into 87,526,697 common shares of the Company.

COVID-19 Pandemic

The outbreak of the COVID-19 virus and the worldwide pandemic has impacted the Company’s plans and activities. The Company may face disruption to operations, supply chain delays, travel and trade restrictions, and impacts on economic activity in affected countries or regions can be expected and are difficult to quantify. Regional disease outbreaks and pandemics represent a serious threat to hiring and maintaining a skilled workforce and could be a major health-care challenge for the Company. There can be no assurance that the Company’s personnel will not be impacted by these regional disease outbreaks and pandemics and ultimately that the Company would see its workforce productivity reduced or incur increased medical costs and insurance premiums as a result of these health risks.

4

DIGATRADE FINANCIAL CORPORATION

Management’s Discussion and Analysis of Financial Conditions and Results of Operations

(“MD&A”)

For the three months ending March 31, 2021

In addition, the pandemic has created a dramatic slowdown in the global economy. The duration of the outbreak and the resulting travel restrictions, social distancing recommendations, government response actions, business disruptions and business closures may have an impact on the Company’s operations and access to capital. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about by the pandemic’s impact on global industrial and financial markets which may reduce share prices and financial liquidity thereby severely limiting access to essential capital.

Selected Annual Information

The following table provides a brief summary of the Company’s annual financial data for the latest three fiscal years ended December 31, 2020:

| | Years ended December 31, | | |
|--|--------------------------|-----------------------|---------------------|
| | 2020 | 2019 | 2018 (Restated) |
| | sd\$ | sd\$ | sd\$ |
| Net loss | | | |
| Basic and diluted loss per share (post-share consolidation) | 2,711,872 (0.01) | (2,094,253) (0.01) | (522,963) (0.01) |
| Total assets | 293,157 | 304,423 | 1,478,985 |
| Total liabilities | 1,862,080 | 735,326 | 1,097,913 |

Results of Operations

For the three months ended March 31, 2021, the Company had a net profit for the period of \$201,231 as compared with a net loss for the period of \$324,739 for the three months ended March 31, 2020.

Accounting Audit and Legal Expenses amounted to \$16,000 for the three months ended March 31, 2021, as compared with \$24,000 for the three months ended March 31, 2020, a decrease of \$8,000. The decrease resulted from additional audit work in connection with the 2019 audit which did not reoccur during the 2021 audit. The Company did not incur any legal expenses during the three months ended March 31, 2021 and 2020, respectively.

Consulting expense for the three months ended March 31, 2021 decreased by \$15,827 to \$53,269 as compared with \$69,069 for the three months ended March 31, 2020. The decrease during the three months ended March 31, 2021 resulted from varying levels of corporate activity during the respective periods.

5

DIGATRADE FINANCIAL CORPORATION

Management’s Discussion and Analysis of Financial Conditions and Results of Operations

(“MD&A”)

For the three months ending March 31, 2021

Management fees for the three months ended March 31, 2021 amounted to \$50,732 as compared with \$64,520 for the three months ended March 31, 2020, a decrease of \$13,788. The decrease during the year three months ended March 31, 2021, resulted from changes in the levels of corporate activity during the respective periods.

During the year three months ended March 31, 2021 the Company incurred Filing and Transfer Agents Expenses in the amount of \$5,487 as compared with \$6,285 incurred during the three months ended March 31, 2020, a decrease of \$798, as a result of decreased filing activity during the period.

The Company incurred Marketing expenses in the amount of \$Nil during the three months ended March 31, 2021, as compared with \$4,039 during the three months ended March 31, 2020.

During the three months ended March 31, 2021, the Company incurred office expenses in the amount of \$3,500, an increase of \$3,500 as compared with \$Nil incurred during the three months ended March 31, 2020,

The Company realized a foreign exchange gains of \$444 during the three months ended March 31, 2021 as compared with a loss on foreign exchange of \$12,615 during the three months ended March 31, 2020. The gain and loss resulted from changes in the foreign currency exchange rates between the Canadian and US Dollars.

The Company incurred Interest Expense during the three months ended March 31, 2021 and 2020 respectively, in the amounts of \$8,498 and \$5,579. This expenditure was incurred in connection with the issuance of Convertible Promissory Notes.

The Company realized Accretion Expenses in the amounts of \$11,988 and \$58,589 for the three months ended March 31, 2021 and 2020, respectively. During the three months ended March 31, 2021, the Company recognized a gain in the fair value of derivative instruments of \$350,496 as compared with a loss of \$57,109 during the three months ended March 31, 2020. The changes in the Fair Value of Derivative instruments resulted from changes in the calculated volatility of the price of the Company's publicly traded stock.

The Company incurred a loss in connection with the operations of Securter Systems Inc. during the three months ended March 31, 2020 in the amount of \$22,811. Following the disposal of the investment in SSI on September 8, 2020, the company incurred no further losses during the three months ended March 31, 2021 in connection with this investment.

6

DIGATRADE FINANCIAL CORPORATION

Management's Discussion and Analysis of Financial Conditions and Results of Operations

("MD&A")

For the three months ending March 31, 2021

Financial position

As at March 31, 2021, the Company had a working capital deficiency of \$147,795 as compared with a working capital deficiency of \$238,702 at December 31, 2020, a decrease in working capital deficiency of \$90,907.

The decrease in working capital deficiency during the three months ended March 31, 2021 is due to increases in Cash of \$8,212 and GST Recoverable of \$2,736, together with decreases in Trade and Other Payables, Convertible Promissory Notes – Liability Component and Promissory Notes amounting to \$30,750, \$49,132 and \$77, respectively.

Liquidity and Capital Resources

As the Company has historically generated nominal revenues from our operations, the Company no internal sources of funds and are reliant upon investors and lenders to fund its operations to continue to further develop its products. The Company has funded its operations to date principally from the sale of convertible promissory notes and, to a lesser extent, sale of equity securities. Management believes that the Company will continue to be reliant upon debt and equity financing to fund continuing operations until the business plan is fully implemented. The Company has incurred losses since inception and have incurred negative cash flows from operations from inception through March 31, 2021.

During the three months ended March 31, 2021 the Company raised \$171,621 by the issuance of Convertible Promissory Notes (three months ended March 31, 2020 - \$79,494).

Changes in non-cash working capital accounts during the three months ended March 31, 2021 provided \$82,695 (the three months ended March 31, 2020 - provided \$9,464).

During the three months ended March 31, 2021, the Company used cash in the amount of \$129,240 to fund the Company's continuing operations (three months ended March 31, 2020 - \$164,382) and invested \$Nil in the operations of SSI (March 31, 2020 – \$26,549).

Risk Factors.

Risks Related to the Business

We have a history of operating losses and need additional capital to implement our business plan.

For the three months ended March 31, 2021, we recorded a net comprehensive profit of \$201,231 as compared to a net comprehensive loss of \$305,426 for the three months ended March 31, 2020. The financial statements have been prepared using IFRS principles applicable to a going concern. However, as shown in note 1 to the unaudited consolidated financial statements for the three months ended March 31, 2021, our ability to continue operations is uncertain.

We continue to incur operating losses and have a consolidated deficit of \$10,303,973 as at March 31, 2021. Operations for three months ended March 31, 2021 have been funded primarily from the issuance of share capital, debt financing and the continued support of creditors. Historically, we have met working capital needs primarily by selling equity to Canadian residents, raising debt finance and from loans (including loans from relatives of principal shareholders).

10

Management's Discussion and Analysis of Financial Conditions and Results of Operations**("MD&A")****For the three months ending March 31, 2021**

We estimate that we will require at least US\$500,000 to further expand in South America and fund the marketing and distribution of the proprietary, patent-pending credit card payment platform to significantly increase the security of online credit card payment processing, reducing financial losses being experienced by financial institutions and merchants from fraudulent credit card use, while also better protecting cardholder privacy. A full implementation of our business plan will be delayed until the necessary capital is raised.

We cannot predict when or if we will produce revenues.

We have not generated any revenue to date from operations. In order for us to continue with our plans and open our business, we must raise capital. The timing of the completion of the milestones needed to commence operations and generate revenues is contingent on the success of this raise. There can be no assurance that we will generate revenues or that revenues will be sufficient to maintain our business.

Our entry into the development of a secure mobile application for card not present "CNP" transaction business may not be successful and there are risks attendant on these activities.

The Financial Technology "FinTech" business is extremely competitive. There are many companies, large and small entering the market with the capital to develop and create new innovative applications resulting in a highly competitive and fast-moving environment. Even with capital and technical expertise, industry, political and compliance risks are significant. Regulatory compliance and the overall ecosystem for secure online payments is extremely complex and not yet fully defined by governments and financial institutions worldwide. We may not be able to finance our business plan and marketing plan, there is no assurance that our entry into this business will be successful.

Cybersecurity risks associated with the FinTech industry are becoming increasingly challenging and we may be unable to meet future regulatory requirements related to data protection and privacy.

Cybersecurity is becoming increasingly challenging with the growth in the number of hackers and financial stalkers seeking opportunities to disrupt operations and/or extort funds from persons or companies whose cybersecurity measures were unable to prevent malicious data harvesting and misuse. We cannot guarantee that all such attempts shall be defeated, nor that our intellectual property shall remain beyond the reach of parties seeking proprietary insights. Data protection and privacy is never absolute, regardless of method(s) used. Independent of any 3rd party malicious intent referred to above, there is a risk that despite best efforts our data protection and privacy shall not meet a future regulatory definition of a reasonable standard, if it is imposed or "expected" retroactively. Information at risk may or may not be financial in nature and may or may not be our own information. We do not have sufficient resources to evaluate all possible outcomes, or all possible measures that we could take now, or could have taken in the past, to attain an even higher level of diligence and care than we are taking presently.

Regulatory compliance in the FinTech sector is evolving.

We are unable to guarantee that we will be able to proceed with all desired plans if the regulatory environment changes in a manner that undermines existing business plans. Such regulations have an impact in every country in which we will be deriving revenue from licensing or by any other commercial mechanism.

11

Management's Discussion and Analysis of Financial Conditions and Results of Operations**("MD&A")****For the three months ending March 31, 2021**

We may be unable to meet growth Open Source technology trends which could have a detrimental impact on our business.

Open source software compliance and vulnerability management has become an area of risk due to the expanding scope of this realm of software. We cannot ensure that we will at all times fully understand the state-of-the-art standing of every aspect of our own development goals until such time that a sufficient expenditure of time, money and effort has been made to understand all open source material and trends, and their relevance to our own interests.

Customers may not adapt to our new technology which may affect our ability to generate revenues in the future.

Culture risk emerges when our organization interfaces with financial institutions as our customers. We do not know in advance whether all our customers will be willing to make changes, if necessary, to accommodate protocols that arise from the adoption of our technology, or incompatibility that may arise from the nature of our software development methods, including our approach to FinTech problem solving.

Reliance on systems governance on third party transactions may risk compliance issues.

Governance for intelligent automation is of increasing importance in business activity that is characterized by a large number of small-dollar-value transactions. Our revenue model requires sharing of transaction fees for commerce that, in aggregate, may represent millions or even hundreds of millions of consumer transactions. We may therefore need to rely upon systems-governance more than individual situational oversight where third party transactions are concerned. This may mean that non-compliance of some type may come to light too late to remedy in the immediate tense and may therefore only be correctable with systemic adjustment for the future.

FinTech is an emerging industry that may be subject to changes in accounting standards in the future the adoption of which may require time for our business to adjust.

New accounting standards in the category of FinTech sector businesses may be introduced over time and have a bearing on our planning, execution and reporting in respect of issues that have hitherto been satisfactory and understood but may require a period of transition to grasp implications at the strategic level and communicate same to shareholders effectively.

Use of data and analytics in our internal audit may become more complex as metadata becomes increasingly important to our analyses.

It is not known whether the effect upon our internal practices of new analytics will remain permissible from the perspective of third-party audits occurring after-the-fact.

12

("MD&A")

For the three months ending March 31, 2021

Our use of Cloud computing, data storage and/or cloud collaboration may not conform to future operational "best practices."

Transitioning to and operating "in the cloud" is a matter whose risks and rewards are subject to conflicting strategies even amongst companies who otherwise are considered to have best practices, operationally. It is not knowable in advance whether our own policies regarding the use of cloud computing, cloud data storage or cloud collaboration in our use of information, our sharing of information and our design of proprietary information assets will conform to a future interpretation of "best practices", after cloud eco-system techniques and their implications are better understood.

We rely on third party service providers which we may not be able to control. This subjects us to risks for failure of performance in development of our business plan.

We will at all times in the pursuit of our goals rely on at least some expertise that is external to our company. Despite best efforts to vet the competency of service providers, it will not be possible to fully appreciate the quality of their contribution until after-the-fact, which may in some instances require second attempts, corrections or new directions. We shall always seek to mitigate our risk and liability arising from any failures of performance that may arise; however, it is not possible to quantify this in financial terms or predict it in operational terms. The risk in our development work is inherently high and does not diminish over time as we will continually focus on customer problems that require new solutions yet to be created.

The loss of key personnel or the inability of replacements to quickly and successfully perform in their new roles could adversely affect our business.

We depend on the leadership and experience of our key executive and chairman, Brad Moynes. Mr. Moynes functions as our chairman and executive officer, and as such, we are heavily dependent upon him to conduct our operations. In 2018, the Company added two additional directors which now brings the board to four directors. We do not have key man insurance. If Mr. Moynes resigns or dies, there could be a substantial negative impact upon our operations. If that should occur, until we find other qualified candidates to become officers and/or directors to conduct our operations, we may have to suspend our operations or cease operating entirely. In that event, it is possible you could lose your entire investment.

13

DIGATRADE FINANCIAL CORPORATION

Management's Discussion and Analysis of Financial Conditions and Results of Operations

("MD&A")

For the three months ending March 31, 2021

Risks Relating to Intellectual Property

If we are unable to protect our intellectual property rights, including those related to Securter technology, our competitive position could be harmed or we could be required to incur significant expenses to enforce our rights.

Our ability to compete effectively is dependent in part upon our ability to protect our proprietary technology. We rely on patents, trademarks, trade secret laws, confidentiality procedures and licensing arrangements to protect our intellectual property rights. There can be no assurance these protections will be available in all cases or will be adequate to prevent our competitors from copying, reverse engineering or otherwise obtaining and using our technology, proprietary rights or products. For example, the laws of certain countries in which our products may be licensed may not protect our proprietary rights to the same extent as the laws of Canada or the United States. In addition, third parties may seek to challenge, invalidate or circumvent our intellectual property, or applications for same. There can be no assurance that our competitors will not independently develop technologies that are substantially equivalent or superior to our technology or design around our proprietary rights. In each case, our ability to compete could be significantly impaired. To prevent substantial unauthorized use of our intellectual property rights, it may be necessary to prosecute actions for infringement and/or misappropriation of our proprietary rights against third parties. Any such action could result in significant costs and diversion of our resources and management's attention, and there can be no assurance we will be successful in such action. Furthermore, many of our current and potential competitors have the ability to dedicate substantially greater resources to enforce their intellectual property rights than we do. Accordingly, despite our efforts, we may not be able to prevent third parties from infringing upon or misappropriating our intellectual property.

Claims by others that we infringe their intellectual property rights could harm our business.

Our industry is characterized by vigorous protection and pursuit of intellectual property rights, which has resulted in protracted and expensive litigation for many companies. Third parties may in the future assert claims of infringement of intellectual property rights against us or against our customers for which we may be liable. As the number of service providers and competitors in our market increases and overlaps occur, infringement claims may increase.

Intellectual property claims against us, and any resulting lawsuits, may result in our incurring significant expenses and could subject us to significant liability for damages and invalidate what we currently believe are our proprietary rights.

Our involvement in any patent dispute or other intellectual property dispute or action to protect trade secrets and know-how could have a material adverse effect on our business. Adverse determinations in any litigation could subject us to significant liabilities to third parties, require us to seek licenses from third parties and prevent us from developing and selling our products. Any of these situations could have a material adverse effect on our business. These claims, regardless of their merits or outcome, would likely be time consuming and expensive to resolve and could divert management's time and attention.

14

DIGATRADE FINANCIAL CORPORATION

Management's Discussion and Analysis of Financial Conditions and Results of Operations

("MD&A")

For the three months ending March 31, 2021

We are generally obligated to indemnify our end-customers for certain expenses and liabilities resulting from intellectual property infringement claims regarding our software products, which could force us to incur substantial costs.

We have agreed, and expect to continue to agree, to indemnify our end-customers for certain intellectual property infringement claims regarding our software products. As a result, in the case of infringement claims against these end-customers, we could be required to indemnify them for losses resulting from such claims or to refund amounts they have paid to us. Our end-customers in the future may seek indemnification from us in connection with infringement claims brought against them. We will evaluate each such request on a case-by-case basis and we may not succeed in refuting all such claims. If an end-customer elects to invest resources in enforcing a claim for indemnification against us, we could incur significant costs disputing it. If we do not succeed in disputing it, we could face substantial liability.

Risks Related to Our Stock

The market price of our shares may fluctuate significantly.

The market price and liquidity of the market for shares may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. Some of the factors that could negatively affect the market price of our shares include:

- our actual or projected operating results, financial condition, cash flows and liquidity, or changes in business strategy or prospects;
- equity issuances by us, or share resales by our stockholders, or the perception that such issuances or resales may occur;
- loss of a major funding source;
- actual or anticipated accounting problems;
- changes in market valuations of similar companies;
- adverse market reaction to any indebtedness we incur in the future;
- speculation in the press or investment community;
- price and volume fluctuations in the overall stock market from time to time;
- general market and economic conditions, and trends including inflationary concerns, the current state of the credit and capital markets;
- significant volatility in the market price and trading volume of securities of companies in our sector, which are not necessarily related to the operating performance of these companies;
- changes in law, regulatory policies or tax guidelines, or interpretations thereof;
- operating performance of companies comparable to us; and
- short-selling pressure with respect to shares of our shares generally.

15

DIGATRADER FINANCIAL CORPORATION

Management's Discussion and Analysis of Financial Conditions and Results of Operations

(“MD&A”)

For the three months ending March 31, 2021

As noted above, market factors unrelated to our performance could also negatively impact the market price of our shares. One of the factors that investors may consider in deciding whether to buy or sell our shares is our distribution rate as a percentage of our share price relative to market interest rates. If market interest rates increase, prospective investors may demand a higher distribution rate or seek alternative investments paying higher dividends or interest. As a result, interest rate fluctuations and conditions in the capital markets can affect the market value of our shares. For instance, if interest rates rise, it is likely that the market price of our shares will decrease as market rates on interest-bearing securities increase.

If we have to raise capital by selling securities in the future, your rights and the value of your investment in the Company could be reduced.

If we issue debt securities, the lenders would have a claim to our assets that would be superior to the stockholder rights. Interest on the debt would increase costs and negatively impact operating results. If we issue more common stock or any preferred stock, your percentage ownership will decrease and your stock may experience additional dilution, and the holders of preferred stock (called preference securities in Canada) may have rights, preferences and privileges which are superior to (more favorable) the rights of holders of the common stock. It is likely the Company will sell securities in the future. The terms of such future transactions presently are not determinable.

If the market for our common stock is illiquid in the future, you could encounter difficulty if you try to sell your stock.

Our stock trades on the OTC "Pink" Marketplace but it is not actively traded. If there is no active trading market, you may not be able to resell your shares at any price, if at all. It is possible that the trading market in the future will continue to be "thin" or "illiquid," which could result in increased price volatility. Prices may be influenced by investors' perceptions of us and general economic conditions, as well as the market for energy generally. Until our financial performance indicates substantial success in executing our business plan, it is unlikely that there will be coverage by stock market analysts will be extended. Without such coverage, institutional investors are not likely to buy the stock. Until such time, if ever, as such coverage by analysts and wider market interest develops, the market may have a limited capacity to absorb significant amounts of trading. As the stock is a "penny stock," there are additional constraints on the development of an active trading market – see the next risk factor.

16

DIGATRADER FINANCIAL CORPORATION

Management's Discussion and Analysis of Financial Conditions and Results of Operations

(“MD&A”)

For the three months ending March 31, 2021

The penny stock rule operates to limit the range of customers to whom broker-dealers may sell our stock in the market.

In general, "penny stock" (as defined in the SEC's rule 3a51-1 under the Securities Exchange Act of 1934) includes securities of companies which are not listed on the principal stock exchanges, or the Nasdaq National Market or the Nasdaq Capital Market, and which have a bid price in the market of less than US\$5.00; and companies with net tangible assets of less than \$2 million (\$5 million if the issuer has been in continuous operation for less than three years), or which has recorded revenues of less than \$6 million in the last three years. As a "penny stock" our stock therefore is subject to the SEC's rule 15c-2, which imposes additional sales practice requirements on broker-dealers which sell such securities to persons other than established customers and "accredited investors" (generally, individuals with net worth in excess of US\$1 million or annual incomes exceeding US\$200,000, or US\$300,000 together with their spouses, or individuals who are the officers or directors of the issuer of the securities). For transactions covered by rule 15c-2, a broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to sale. This rule may adversely affect the ability of broker-dealers to sell our stock, and therefore may adversely affect our stockholders' ability to sell the stock in the public market.

If you are a United States investor, your legal recourse could be limited.

The Company is incorporated under the laws of British Columbia. Most of the assets now are located in Canada. Our directors and officers and the audit firm are residents of Canada. As a result, if any of our shareholders were to bring a lawsuit in the United States against the officers, directors or experts in the United States, it may be difficult to effect service of legal process on those people who reside in Canada, based on civil liability under the Securities Act of 1933 or the Securities Exchange Act of 1934. In addition, we have been advised that a judgment of a United States court based solely upon civil liability under these laws would probably be enforceable in Canada, but only if the U.S. court in which the judgment were obtained had a basis for jurisdiction in the matter. We also have been advised that there is substantial doubt whether an action could be brought successfully in Canada in the first instance on the basis of liability predicated solely upon the United States' securities laws.

Approval

The Board of Directors of Digatrader Financial Corporation has approved the disclosures in this MD&A.

EX-99.3 4 digaf_ex993.htm CERTIFICATION

Exhibit 99.3

Form 52-109FV2
Certification of Interim Filings
Venture Issuer Basic Certificate

I, Brad J. Moynes, Chief Executive Officer of Digatrade Financial Corp., certify the following:

1. **Review:** I have reviewed the interim financial report and interim MD&A (together, the “interim filings”) of Digatrade Financial Corp. (the “issuer”) for the interim period ended March 31, 2021
2. **No misrepresentations:** Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by the interim filings.
3. **Fair presentation:** Based on my knowledge, having exercised reasonable diligence, the interim financial report together with the other financial information included in the interim filings fairly present in all material respects the financial condition, financial performance and cash flows of the issuer, as of the date of and for the periods presented in the interim filings.

Date: April 28, 2020

Chief Executive Officer

NOTE TO READER

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings* (NI 52-109), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of

- i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

I, Brad J. Moynes, Chief Financial Officer of Digatrade Financial Corp., certify the following:

1. **Review:** I have reviewed the interim financial report and interim MD&A (together, the “interim filings”) of Digatrade Financial Corp. (the “issuer”) for the interim period ended March 31, 2021
2. **No misrepresentations:** Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by the interim filings.
3. **Fair presentation:** Based on my knowledge, having exercised reasonable diligence, the interim financial report together with the other financial information included in the interim filings fairly present in all material respects the financial condition, financial performance and cash flows of the issuer, as of the date of and for the periods presented in the interim filings.

Date: April 28, 2021

/s/ Brad J. Moynes

Brad J. Moynes
Chief Financial Officer

NOTE TO READER

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings* (NI 52-109), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of

i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and

ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.
